

## AZ-204 - Questions (December 2025)

The screenshot shows a Q&A interface with a sidebar on the left containing 'Inbox [2]' and 'Trash'. The main area displays a table of questions. The table has columns for '#', 'Name', 'Company', 'Question', 'Priority', and 'Received'. There are two questions listed. The first question (ID 1) is about deploying a containerized application using Helm charts. The second question (ID 2) is about the 'Premium' tier in Azure namespaces and its pricing compared to AWS.

#	Name	Company	Question	Priority	Received
2	[Redacted]	[Redacted]	we saw a few "Premium" things, like in Namespaces. How much of that is there in Azure? In AWS, usually the price is "implied" like t3.large will probably cost more than t3.small. This "Premium" is kind of intimidating and I hope it not often seen?		11:58 am
1	[Redacted]	[Redacted]	can we deploy a containerized application to container apps using a helm chart ?		09:26 am

1. You can not directly use Helm with Azure Container Apps. However you can use them with AKS, or store the charts in ACR. See below:
  - a. Quickstart: Develop on Azure Kubernetes Service (AKS) with Helm:  
<https://learn.microsoft.com/en-us/azure/aks/quickstart-helm?tabs=azure-cli>
  - b. Push and pull Helm charts to an Azure container registry:  
<https://learn.microsoft.com/en-us/azure/container-registry/container-registry-helm-repos>
2. You 'll see many Azure resources offering the "Premium" tier, and I agree! It can be intimidating at the beginning. However, you can use the following tools to get pricing details before proceeding:
  - a. Azure Pricing Calculator. Simply choose your service, and tier, to check the price  
<https://azure.microsoft.com/en-ca/pricing/calculator>
  - b. Individual Azure Service pricing page, for instance "Service Bus Pricing"  
<https://azure.microsoft.com/en-ca/pricing/details/service-bus>
  - c. Check out "Module 06: Costs Management in Azure" in my AZ-900 course for details:
